Decisions

=====

* We have decided to use Camel-casing as our code standard for our project.

* We have also decided to use Sphinx as our documentation tool for our project

* We had uploaded all the previous works in Github.

Actions

=====

1. Making use case for our project.
2. Making use case diagram also.
3. Making use case title, actor, scenario, pre-condition, post-condition and exception for each use case.
